

Vue Data Binding Exercises

Shopping List Exercise

In this exercise, you'll continue working on the shopping list you built in an earlier exercise. Specifically, you'll work on:

- Creating an array of simple strings
 - Looping over those items using `v-for`
- Creating an array of shopping cart objects
 - Looping over those items using `v-for`
- Class binding

Shopping Cart Exercise

In a typical shopping cart application, you check out and then go through a series of steps. In this exercise, you'll work with the step that collects the shipping and billing addresses from a user. This exercise covers:

- Data Binding with Input Elements
