Vue Event Handling

Overview of Session

The students have already seen what event handling in JavaScript looks like. Now you get a chance to show them how easy it is to work with events in Vue. Vue handles attaching event listeners for us using the v-on syntax and all event handlers are now just methods on our component.

Session Objectives

- Event handling in Vue
- v-on
- Keyboard Events
- Mouse Events
- Event Handler Arguments

Instructor Notes

- [Lecture Code Walkthrough]
